ColoSpace Announces Bedford, NH Data Center Opening July 1st

Monday June 19, 6:00 am ET

Managed Services and Disaster Recovery Solutions slated for Bedford Facility

BEDFORD, N.H.--(BUSINESS WIRE)--June 19, 2006--ColoSpace, Inc. a leading provider of colocation and managed services announces the opening of their 6th New England Data Center located in Bedford, NH.

The Bedford facility will serve clients throughout New England including Boston area firms seeking Disaster Recovery solutions. The facility has been designed with the most comprehensive engineering standards and boasts its convenient location for clients. The Data Center sits within 5 miles of Manchester Airport and approximately 55 Minutes driving time from Boston.

"The Bedford Facility compliments our Manchester, NH Data Center," says Wayne Sawchuk, CEO. "We are nearing capacity in the Manchester Data Center and now have a 2nd option for our customers similar to the Massachusetts facilities."

One key advantage to the Bedford Data Center is that organizations now have the ability to purchase a high speed blended bandwidth option within a Class A secure facility and not have to fight the traffic to Boston. This new facility utilizes installed OC48 Fiber from Verizon's multiple Central Offices, ATT and MCI. Replicating the recently opened ColoSpace Rockland, MA Data Center, Bedford will offer an industry leading 4 AMPS per square foot of electricity to accommodate dense computing power in preparation of blade server technologies.

ColoSpace' Bedford Data Center will offer the following: N+1 CRAC HVAC for cooling & Moisture Controls, N+1 UPS & PDUs for Redundant Power, Backup Generator power with 72+ hours of Fuel, 30" Raised Floor Environment, Dual Authentication Security Controls, Multiple TVSS (Transient Voltage Surge Suppression systems), Fully Grounded Lightning Protection, VESDA Detection with Intergen Gas Fire Suppression, Customized Cage, Cabinet and Suite Space built to customer specifications, Six Tier-1 bandwidth connectivity providers with a 100% uptime SLA, Completed Managed Services and Disaster Recovery Services.

ColoSpace (www.colospace.com) is a leading provider of Application Hosting, Colocation, and Disaster recovery services in New England. Headquartered in Rockland, Massachusetts, ColoSpace operates a network of six Internet Data Centers (IDCs) throughout the region. From these IDCs ColoSpace deploys high availability services to firms located throughout the world. ColoSpace' customers include some of the largest firms in the Financial Services, Healthcare, and High Technology industries.
