

March 2008 Newsletter

New Data Center Location & Open House Event:

ColoSpace, Inc. is pleased and excited to announce the opening of their 6th Data Center location on Winter Street in Waltham, MA. Strategically located outside of Boston in the heart of the Route 128 technology hub, this 16,000 sq ft raised floor data center facility will be accepting customers as of March 17, 2008. ColoSpace is hosting an Open House that is open to all our current customers and any guests they wish to bring on April 3rd from 4-7PM. Individuals interested attending should RSVP at www.colospace.com/RSVP.

SAS70 Type II Audit Underway:

Customers may see more than just our helpful engineering staff when they visit the data center in the next few months. Our auditor, UHY LLP is performing an extensive SAS70 Type II audit of all six ColoSpace Data Centers. This audit, which is an assessment of our internal controls with a strong focus on data center security, redundancy, and design, will conclude in the third quarter of 2008. Customers who are interested in receiving a copy of our SAS70 report when it is completed can contact Aimee Dalton, Client Relations Specialist at adalton@colospace.com.

ColoSpace's Involvement to "Help Keep the Lights On":

In our continued effort to help reduce ColoSpace's impact to our local and global environment, ColoSpace has joined with another local firm, EnerNOC, to help reduce electric consumption during periods of peak demand. The Demand Response Program provides ColoSpace's Network Operations Center with proactive notification during events of peak energy consumption and potential instability with the local power grid. This proactive notification allows ColoSpace to utilize backup emergency generator systems during such periods and avoids any potential impact to the data center environment.

The DRP program further helps local utilities avoid large, potentially environmentally damaging expansion of existing power generation facilities for relatively short periods of peak demand. This allows ColoSpace to offer more reliable service while also reducing our impact to the environment, a true win-win scenario.

Save Time and Paper with E-Billing!

In addition to reducing our overall carbon footprint, ColoSpace has also embarked in an effort to reduce the amount of waste we produce. Customers can now pay their monthly bill electronically using automated ACH payments. The electronic payment is scheduled monthly, eliminates the need to mail payments, and avoids finance charges. Please e-mail billing@colospace.com for more information.

Product Offerings:

Managed Services include:

- Server and Application Management/Monitoring
- Managed Security Services
- Managed Firewall
- Vulnerability Management
- Microsoft Active Directory Administration
- Oracle and Microsoft SQL Database Administration
- Managed Backup and Storage Services
- Hardware Rental

Disaster Recovery:

- Off Site Data Center and Operations Space
- Off Site Server Environments

Colocation and Apphosting are also available. If you have any questions regarding possible services please contact our sales team at 888-583-9200.
